PROFESSIONAL SUMMARY

AI and Machine Learning enthusiast with a Bachelor of Data Science (CGPA: 8.2/10) from Savitribai Phule Pune University. Hands-on experience building Agentic AI systems, LLM-powered applications, and intelligent automation solutions using Python, Flask, and modern AI frameworks. Demonstrated ability to design and deploy AI agents, multi-modal ML pipelines, and computer vision systems. Passionate about emerging AI technologies and committed to delivering real-world AI-driven solutions. Seeking to contribute as a Junior Associate (AI Services) to build impactful AI-powered products.

TECHNICAL SKILLS

AI & ML:	LLMs, AI Agents, Machine Learning, Deep Learning, Computer Vision, NLP, Prompt Engineering
Languages:	Python, SQL
Frameworks:	Flask, React, FastAPI, OpenCV, MediaPipe
ML Libraries:	Pandas, NumPy, Scikit-learn, Prophet, XGBoost, TensorFlow (basic)
AI Tools:	Llama 3, LangChain (conceptual), RAG Pipelines, AI Agent Orchestration
Databases:	MySQL, Relational Databases
Tools:	Git, GitHub, Jupyter Notebook, VS Code, Power BI
Soft Skills:	Analytical Thinking, Problem Solving, Cross-functional Collaboration, Technical Communication

PROJECTS

Cloud Cost Forecasting Engine [\[GitHub\]](#)

React | Flask | Prophet | XGBoost | Llama 3 | Agentic AI

- Architected an end-to-end Agentic AI system for cloud cost forecasting combining React frontend, Flask backend, and ensemble ML models (Prophet, XGBoost) to predict infrastructure spend with high accuracy.
- Integrated Llama 3 LLM as an intelligent AI agent to provide natural language explanations of cost anomalies and actionable optimization recommendations to stakeholders.
- Designed modular agent pipeline enabling automated data ingestion, feature engineering, model retraining, and report generation — reducing manual analysis effort by 60%.

Society Compliance Copilot [\[GitHub\]](#)

Python | Web Scraping | AI Agents | Data Processing | Automation

- Built an intelligent compliance copilot using Python to automate data extraction from multiple government regulatory portals, processing thousands of records with configurable scraper modules.
- Implemented modular architecture with config-driven scraping, robust error handling, logging, and data migration pipelines ensuring reliable and scalable data collection workflows.
- Designed the system to support intelligent compliance monitoring, reducing manual document review time by 70% through automated data aggregation and structured reporting.

MIDC Proposal Approval Risk Predictor Using AI Agents

Python | AI Agents | Machine Learning | Risk Assessment | Automation

- Developed an intelligent risk prediction system using AI agents to assess and predict the approval likelihood of MIDC (Maharashtra Industrial Development Corporation) proposals based on historical data patterns.
- Engineered AI agent workflows for automated document analysis, risk factor extraction, and multi-criteria decision scoring — enabling proactive risk identification before formal submission.
- Implemented ML-based risk scoring models with explainable AI outputs, providing stakeholders with actionable insights and improvement recommendations to increase proposal approval rates.

Real-Time Workout Tracker Using Pose Estimation

Python | OpenCV | MediaPipe | Computer Vision | Machine Learning

- Architected a real-time workout tracking system using Python, OpenCV, and Google MediaPipe, processing live video streams at 30 FPS on standard hardware for fitness applications.
- Implemented multi-joint pose estimation and landmark detection algorithms to accurately count squats and push-ups, achieving 95%+ repetition detection accuracy through optimized CV pipelines.
- Designed gamified visual overlays and live feedback HUD; optimized detection logic to reduce false-positive rep counts by 40% through intelligent joint-angle filtering and movement thresholding.

EDUCATION

Bachelor of Data Science

June 2025

Savitribai Phule Pune University (SPPU) | Pune, Maharashtra

CGPA: 8.2 / 10

Relevant Coursework: Machine Learning, Deep Learning, Database Management, Statistics, Artificial Intelligence, Data Visualization

CERTIFICATIONS & TRAINING

- Data Visualization: Empowering Business with Effective Insights — Forage (Virtual Experience Program)
- SQL for Data Engineers: Designing and Building Data Pipelines — Udemy (Verified Certificate)

KEY ACHIEVEMENTS & AWARDS

- Guinness World Record Contributor — Directly supported SPPU's record-breaking Meri Maati Mera Desh data campaign as part of the Department of Technology team (December 2024).
- Academic Excellence — Maintained CGPA of 8.2/10 throughout 3-year Bachelor of Data Science program at a premier university.
- End-to-End AI Project Delivery — Independently scoped, built, and deployed multiple production-quality AI/ML projects including Agentic AI systems with measurable outcomes.
